## About us:

Thalamus Institute of Medical Sciences is a state-of-the-art Super Speciality Hospital established to provide comprehensive, accurate, and cutting-edge medical services. It serves the people of Siliguri, districts of Northern Bengal, and other adjoining areas of national and international importance. The institute aims to provide the highest standard of clinical expertise and nursing care through a holistic approach, quick assessment, and apt intervention for a multitude of diseases. It boasts an efficient team of clinicians, paramedical staff, and support staff dedicated to patient care, and is equipped with top-notch and avant-garde medical devices. Located amidst the Sub Himalayan foothills and the pristine Kanchenjunga, it ensures that healing and recovery follow a superlative pace.

### Mission:

To offer healthcare solutions of the highest standards, founded on the spirit of compassion and unwavering commitment to alleviate disease and enhance quality of life.

### Vision:

We envision to become the most trusted hospital of choice for everyone's healthcare needs.

## Chairman's Message

Thalamus Institute of Medical Sciences (TIMS), Siliguri, has been established with the sole motto of providing cutting-edge and avant-garde medical services to inhabitants of this region and adjoining areas. Siliguri, being an important town in the northern fringes of West Bengal, happens to be the only destination for tertiary-level healthcare. During my practice as a consultant neurosurgeon for the last few decades, I have always felt the burning need and desire to provide the best of medical science to the ailing population of this region, which led to the inception of this institute.

We aim to become a landmark in the field of medical care so that, with our expert team of professionals, we can provide accessible and affordable healthcare to people from all walks of life. Great ideologies have greater responsibilities, and the goals in healthcare are to safeguard, encourage, and at times cultivate the social fabric of society as a whole. Through our essence of high teamwork, we are quite optimistic about bringing together all necessary disciplines and skills, thereby ensuring a holistic approach to the patient. Wishing all the very best of health!

### Dr. Malay Chakraborty

MBBS, MS, MCh (Neurosurgery), FNS (England)

Director and Senior Consultant Neurosurgeon
